

AIM GRAFFITI REMOVER'

**EASY APPLICATION; PROFESSIONAL GRADE SOLVENT;
WIPE ON, SPRAY OR BRUSH ON GRAFFITI REMOVAL LIQUID;**

Description:

AIM Graffiti Remover is a non-toxic and highly active, fast penetrating solvent for smooth surface graffiti removal. Wipe-on wipe-off. Easy application.

Characteristics:

AIM Graffiti remover is a water-thin, fast acting industrial solvent which will remove most types of graffiti - spray enamel, texta, lipstick and chalk.

AIM Graffiti Remover is designed for regular use, quick removal maintenance.

AIM Graffiti Remover offers an inexpensive method of removing graffiti and heavily contaminated surfaces.

Directions for use:

AIM Graffiti remover is non-toxic and low in odour, also displaying a high flashpoint.

AIM Graffiti remover is ideal for application by spray or brush. Wear gloves.

AIM Graffiti Remover is suitable for removing almost all types of graffiti compounds from painted surfaces, metals, glass, tiles, ceramics, smooth faced bricks and concrete.

Apply by brush, low pressure spray or wipe onto surface with rag. Allow 5 to 15 minutes for solvent to penetrate and soften graffiti. Then agitate surface with brush or rag or use pressure water.

In all cases, wash down surface with water or dilute detergent solution.

Note:

For more porous surfaces such as bricks, stone or cement render and where the graffiti has soaked into the pores, it may be necessary to use a different method of graffiti removal. Apply CH8880 Paint Stripper by brush or spray to remove bulk of graffiti, then remove shadowing with a dilute solution of AC80SL reactive detergent. Refer to a AIM Chemicals for further information.

The Safer Alternative

Safety: Avoid contact with skin and eyes. Wear gloves, goggles, protective footwear and clothing.

First Aid: If poisoning occurs, contact a doctor or Poisons Information Centre. If swallowed, induce vomiting, using Ipecac Syrup, if available. Avoid giving alcohol. If skin contact occurs, remove contaminated clothing and wash skin thoroughly.

If accidentally splashed in eyes, hold eyelids open, flush with water for 15 minutes, then seek medical attention.
